### **KNIGHT & CARVER PARTNERS WITH WINDPRO FOR BLADE INSPECTIONS CREWS TO PROVIDE DAMAGE ASSESSMENT REPORTS WITHIN 48 HOURS**

NATIONAL CITY, CALIFORNIA – Knight & Carver Wind Group has entered into a long-term service agreement with WindPro Insurance, a division of GCube Insurance Services, Inc., and the largest provider of insurance to the wind energy industry.

Under the agreement, Knight & Carver, a leading blade repair, service and fabrication firm, dispatches its blade inspectors to wind farms with damaged blades within a 48-hour time frame.

Upon the initial inspection phase, designed to take only a few hours, Knight & Carver's team of inspectors then provide a thorough repair assessment to WindPro. A follow-up formal report is generated which includes photos, analysis and a repair estimate.

This agreement further strengthens the working relationship between the two firms. Knight & Carver had previously partnered with WindPro to provide a lower deductible and/or rate for wind farm operators that contract with Knight & Carver's service plan for blade repair, service and maintenance.

"We're pleased to join with WindPro to provide this valuable, time-sensitive service," said Gary Kanaby, Knight & Carver's Vice President of Sales. "This is another example of our commitment to join with the best service providers in the industry."
